- Publishing to Articulate Review 360
- Library
- Managing the content

## About Articulate 360 training

You'll learn how to build complete modules using Rise 360, as well as how to supplement these modules with additional content using the Articulate 360 tools - Peek and Replay. You'll learn which tool to use when, and walk away with a deeper understanding of the award-winning Articulate suite of tools.

## Duration

The virtual sessions are made up of four hours of live instruction, divided into two sessions. Application exercises are assigned as homework at the end of each session and online solution sets are provided.

## Prerequisites

Participants should have Articulate 360 installed, or the Articulate 360 free trial downloaded on their PCs. This training session is designed for a variety of skill levels. All participants should have basic computer skills and familiarity with some of the more common user interfaces (such as PowerPoint and browser windows).

You will also need to make sure that you have access to a stable wireless internet network to access the 360 applications. Please test this prior to attending the training session.
